This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Architas Global Opportunity 2

a Sub-Fund of **Architas Multi-Manager AFA Unit Trust Class A (EUR) Units (IE00B3S37X37)**

This Fund is managed by Architas Multi-Manager Europe Limited, part of the AXA Group

Objectives and Investment Policy

The aim of the Fund is to provide a combination of income and capital growth.

The Fund will invest primarily either directly or indirectly in:

- (i) equity shares in companies trading on regulated markets;
- (ii) fixed income securities (i.e. debt instruments) trading on regulated markets issued by companies or public institutions;
- (iii) debt instruments that can be converted into equity shares.

The debt instruments in which the Fund may invest will be issued both by entities who are considered to be capable of repaying the debt and entities where there is a risk of them not repaying the debt (i.e. defaulting);

- The Fund may also invest in cash deposits, investments which can be bought and sold easily and which pay interest on a daily basis, investment funds and contracts that deliver returns that derive from the value of some other assets, contracts or indices (i.e. derivatives).
- The Fund can, by buying the investments above, have an exposure to real estate or to commodities.

- The investments of the Fund may be pooled with other investments of other funds of the Trust.
- The Fund may use derivatives to increase the potential income from an investment or to reduce and/or limit risk, including the risk of a debt issuer defaulting.
- The Fund may use derivatives to acquire liabilities, provided that the value of these liabilities does not exceed 100% of the value of the Fund. This is known as 'leverage'.
- You may sell your Units back to the Fund on any business day. The Fund may pay income and other profits to you from time to time in the form of a dividend.

We will automatically include income from the Fund's investments in the value of your units.

The base currency of the Fund is EUR.

The Fund's investments may be priced in currencies other than Euro. The Investment Manager may use derivative instruments to convert the value of those investments into Euro.

You may sell your investment on a daily basis.

Risk and Reward Profile

This risk indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The lowest category does not mean risk free.

The risk and reward category may shift over time and is not guaranteed.

Your investment in the Fund is not guaranteed. The Fund is invested in financial assets and instruments and uses financial techniques that are subject to levels of variation, that may result in gains or losses.

Funds of category 4 have shown in the past a low to medium volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 4 might be subject to low to medium price fluctuations based on the historical volatility observed.

The following are additional risks not covered by the risk and reward category:

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Fund of funds - Liquidity Risk: The Fund invests in other funds and its liquidity depends upon the liquidity of those underlying funds. If underlying funds suspend or defer the payment of redemption proceeds, the Fund's ability to meet redemption requests may also be affected.

Credit Risk - Bonds: The Fund may invest in bonds which provide a fixed or variable return and which are a form of loan, the value of which depends on the issuer being able to make its payments. There is a risk that the issuer will fail to do so. Although the Fund generally invests in bonds with high ratings, a high rating does not guarantee an issuer's ability to pay.

Credit Risk - Non-Investment Grade Bonds: The Fund may invest in bonds issued by entities considered to be more likely to default (non-investment grade). If an issuer does default this may result in the Fund and your investment suffering a loss.

Investment Manager/Sub-Investment Manager Risk: The Fund relies upon the performance of one or more investment managers. If the investment managers perform poorly, the value of the Fund and your investment is likely to be adversely affected.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	3.00%

This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).

Charges taken from the Fund over a year

Ongoing charge	0.79%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	none
-----------------	------

The entry and exit charges shown are maximum figures. In some cases, you might pay less - you can find this out from your financial adviser or distributor.

The ongoing charges figure is based on the expenses for the twelve month period ending 30th September 2018. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another fund.

For more information about charges, please see the section entitled "Fees and Expenses" in the Fund's prospectus and supplement, each of which are available on request free of charge from the manager.

Past Performance

Past performance is not a reliable indicator of future performance.

The past performance shown here takes account of ongoing charges. The entry/exit fees are excluded from the calculation of past performance.

The Fund started to issue units in September 2011.

Past performance has been calculated in EUR and is expressed as a percentage change of the Fund's net asset value per unit at each year end.
