

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

AXA Selection Alliance Bernstein Dynamic Diversified

a Sub-Fund of **Architas Multi-Manager Global Funds Unit Trust Retail Class R (EUR) Units** (IE00B414H412)

This Fund is managed by Architas Multi-Manager Europe Limited, part of the AXA Group

Objectives and Investment Policy

The aim of the Fund is to maximise the return from your investment.

The Fund is actively managed and will invest globally in multiple asset classes such as shares, tradable debt (bonds), financial contracts (derivatives) and other funds. Indirect exposure to real estate and commodities may be obtained through investment trusts, derivatives and shares. The allocation between asset classes will be managed dynamically, although under normal market conditions it is expected that the fund will mainly be invested in shares.

Investments may include the use of shares and derivatives which are linked to credit risk or interest rates. The Fund may invest in shares, bonds and other forms of tradable debt listed or traded on a regulated exchange. The bonds which the Fund invests in, which will either pay fixed or variable interest, are issued by companies and public bodies, some of which are given a rating by a recognised rating agency which takes into account factors such as creditworthiness. The Fund may only invest up to 30% of its assets in bonds which are unrated or which have a relatively higher risk of default (non-investment

grade); or 30% of its assets in bonds linked to underlying mortgages or other assets. The Fund may also invest up to 30% of its assets in emerging markets.

Investment in other funds is limited to 10% of the Fund's assets. The Fund may also invest in derivatives under which the return on one asset will be swapped for the return on another asset (swaps). Swaps are used to enable the Fund to offset potential losses that may be incurred by other investments made (hedging) as well as to give the Fund access to investments which are not otherwise readily accessible.

Where the use of swaps results in the Fund holding a substantial portion of its assets in cash, the investment manager may invest this cash on a discretionary basis.

The Fund does not have a benchmark.

We will automatically include income from the Fund's investments in the value of your units.

You may sell your investment on a daily basis.

The base currency of the Fund is EUR.

Risk and Reward Profile

This risk indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The lowest category does not mean risk free.

The risk and reward category may shift over time and is not guaranteed.

Your investment in the Fund is not guaranteed. The Fund is invested in financial assets and instruments and uses financial techniques that are subject to levels of variation, that may result in gains or losses.

Funds of category 5 have shown in the past a medium to high volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 5 might be subject to medium to high price fluctuations based on the historical volatility observed.

The following are additional risks not covered by the risk and reward category:

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Credit Risk - Bonds: The Fund may invest in bonds which provide a fixed or variable return and which are a form of loan, the value of which depends on the issuer being able to make its payments. There is a risk that the issuer will fail to do so. Although the Fund generally invests in bonds with high ratings, a high rating does not guarantee an issuer's ability to pay.

Currency Risk: The Fund invests in overseas markets and the value of the Fund may fall or rise as a result of changes in exchange rates.

Investment Manager/Sub-Investment Manager Risk: The Fund relies upon the performance of one or more investment managers. If the investment managers perform poorly, the value of the Fund and your investment is likely to be adversely affected.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	3.00%

This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).

Charges taken from the Fund over a year

Ongoing charge	2.15%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	none
-----------------	------

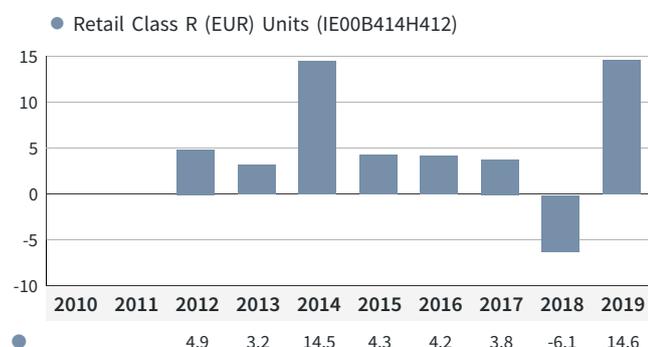

The entry and exit charges shown are maximum figures. In some cases, you might pay less - you can find this out from your financial adviser or distributor.

The ongoing charges figure is based on the expenses for the twelve month period ending 30th September 2019. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another fund.

For more information about charges, please see the section entitled "Fees and Expenses" in the Fund's prospectus and supplement, each of which are available on request free of charge from the manager.

Past Performance

Past performance is not a reliable indicator of future performance.

The past performance shown here takes account of ongoing charges. The entry/exit fees are excluded from the calculation of past performance.

The Fund started to issue units in July 2011.

Past performance has been calculated in EUR and is expressed as a percentage change of the Fund's net asset value per unit at each year end.
